VOLUME 43, 1996

Canadian Journal of Anaesthesia

Index of Authors

Volume 43, 1996

- Abramson DC. Eschew the ACHOO! (correspondence – reply), 192
 – see Ezri T, jt. auth.
 – see Koch SM, jt. auth.
- Ackerman TS, see Storella RJ, jt. auth.
- Adams DC, see Schwartz AE, jt. auth.
- Adams M, see Jaeger M, jt. auth.
- Adams TJ, see Grange CS, jt. auth.
- Aimono M, see Nakayama M, jt. auth.
- Aitkenhead AR. Awareness during anaesthesia: when is an anaesthetic not an anaesthetic? / La conscience sous anesthésie ou quand un anesthésie cesse de l'être (editorial), 206
- Akasaka N, see Kawamura T, jt. auth.
- Alahdal OA, see Vaghadia H, jt. auth.
- Alam S. Epidural catheter connector (correspondence), 642
 – Saito Y, Kosaka Y. Antinociceptive effects of epidural and intravenous ketamine to somatic and visceral stimuli in rats (laboratory investigation), 408
- Alesker E, see Gurmarnik S, jt. auth.
- Al-Hasani A, see Searle N, jt. auth.
- Ali MJ, Ballantyne M, Norris D. What is delaying extubation after heart surgery? A40-A
- Al-Oufi H, see Kashkari I, jt. auth.
- Alvarez J, see Franco A, jt. auth.
- Amaha K, see Saitoh Y, jt. auth.
- Amar D, see Cohen S, jt. auth.
- Ananthanarayan C, Paek W, Rolbin SH, Dhanidina K. Hysteroscopy and anaesthesia (review article), 56
- Anderson BA, see Pascoe EA, jt. auth.
- Ansermino JM, Sanderson PM, Bevan JC, Bevan DR. Acceleromyography improves detection of residual neuromuscular blockade in children, 589
- Ansley DM. Anaesthesia fellowships in Canada (correspondence), 984
 – O'Connor JP, Merrick PM, Ricci DR, Dolman J, Kapnoudhis P. On line ST-segment analysis for detection of myocardial ischaemia during and after coronary revascularization, 995
 – see Dryden PJ, jt. auth.
- Antecol D, see Johnson D, jt. auth.
- Antognini JF. Movement associated with high cerebral concentrations of isoflurane: no evidence of seizure activity (laboratory investigation), 310
- Aoyama K, Takenaka I, Sata T, Shigematsu A. Cricoid pressure impedes positioning and ventilation through the laryngeal mask airway, 1035
- Archer DP, Ewen A, Froelich J, Roth SH, Samanani N. Thiopentone induced enhancement of somatic motor responses to noxious stimulation: influence of GABA_A receptor modulation, 503
- Arellano R, see Halpern SH, jt. auth.
- Arndt GA, Voth BR. Paradoxical vocal cord motion in the recovery room: a masquerader of pulmonary dysfunction: clinical report), 1249
- Arney KL, see Henderson CL, jt. auth.
- Asai T. Blind tracheal intubation through the laryngeal mask (correspondence), 1275
 – see Stacey MRW, jt. auth.
- Asantila R, see Cozanitis D, jt. auth.
- Asantila R, see Cozanitis D, jt. auth.
- Ashbury T, see Jaeger M, jt. auth.
- Ashour M, see Naguib M, jt. auth.
- Asokumar B, see Cheng DCH, jt. auth.
- Attia M, see Naguib M, jt. auth.
- Attolini L, see Gantenbein M, jt. auth.
- Au JW, see LeDez KM, jt. auth.
- Auslander S, see Yaniv R, jt. auth.
- Avidan A, see Shenkman Z, jt. auth.
- Avraamides EJ, Murkin JM. The effect of surgical dislocation of the heart on cerebral blood flow in the presence of single, two-stage venous cannula during cardiopulmonary bypass, A36-B
- Azofra J, see Menendez B, jt. auth.
- Backman SB, Fox GS, Stein RD, Ralley FE. Neostigmine decreases heart rate in heart transplant patients, 373
 – Stein RD, Blank DW, Collier B, Polosa C. Different properties of the bradycardia produced by neostigmine and edrophonium in the cat (laboratory investigation), 731
 – Stein RD, Fox GS, Polosa C. Effect of edrophonium on heart rate in cardiac transplant patients and in the denervated cat heart A29-B
 – Stein RD, Ralley FE, Fox GS. Neostigmine-induced bradycardia following recent vs remote cardiac transplantation in the same patient: clinical report, 394
- Badner NH, Bourne RB, Rorabeck CH, Doyle JA. The addition of morphine to intra-articular bupivacaine does not improve outcome following knee joint replacement, A54-A
 – Komar WE, Bhandari R, Craen R, Cullerier D, Dobkowski WB, Smith MH, Vanelli AN. Patient attitudes regarding PCA and associated costs, A53-B
 – Reid D, Sullivan P, Ganapathy S, Crosby ET, McKenna J,

Canadian Journal of Anaesthesia

Index of Subjects

Volume 43, 1996

Abstracts, structured: editorial (Johnson and Bevan), 1

Acetaminophen, *see under* Pharmacology

Acetylcysteine, *see under* Lungs, mucus

Acute respiratory distress syndrome, *see under* Lung

Age factor

- chewing gum prior to anaesthesia - is not age restricted: correspondence (Tays and Brock-Utne), 1080
- does patient age influence the ease of spinal anaesthesia? (Tessler *et al*), A57-A
- elderly ASA III patients, haemodynamic and ventilatory changes during laparoscopic cholecystectomy in (Dhoste *et al*), 783
- patient controlled analgesia in the elderly surgical population (Corvo *et al*), A54-B
- patient controlled propofol sedation for elderly patients: safety and patient attitude toward control, 1014

Airway

- *assessment*
 - inter-observer reliability of ten tests used for predicting difficult tracheal intubation (Karkouti *et al*), 554
 - what's the best test? editorial (Bainton), 541
- closure and intraoperative hypoxaemia: twenty-five years later: review article (Wahba), 1144
- difficult, anaesthetic management of a parturient with severe muscular dystrophy, lumbar lordosis and: clinical anaesthesia file (Pash), 959
- difficult, central anticholinergic syndrome complicating management of: correspondence (Ezri *et al*), 1079
- extubation, difficult, use of an endotracheal tracheal ventilation catheter in management: technical report (Cooper), 90
- *laryngeal mask*
 - acute transient unilateral macroglossia following use: correspondence (Maltby *et al*), 94
 - cricoid pressure impedes positioning and ventilation through the laryngeal mask airway (Aoyama *et al*), 1035
 - for awake intubation for Caesarean section: clinical report (Godley and Reddy), 299
- insertion
 - comparison of propofol versus thiopentone with midazolam or lidocaine to facilitate (Bapat *et al*), 564
 - with a laryngoscope in paediatric patients (Elwood and Cox), 435
- leak reduction with LMA: correspondence (Brimacombe and Berry), 537
- lower injuries and anaesthesia: review article (Devitt and Boulanger), 148; correspondence (Desjardines and Varon), 1181; reply (Devitt and Boulanger), 1182

- management in a patient with penetrating injury of the floor of the mouth: clinical report (Ng and Lo), 1156
 - management in neuroanaesthesia: review article (Spiekermann *et al*), 820
 - management during positive pressure ventilation, face mask and laryngeal mask airway compared (Ho-Tai *et al*), A26-B
 - management in neuroanaesthesia: refresher course outline (Cottrell), R61; R69
 - monitoring, with ultrathin fiberoptic bronchoscope during anaesthesia to remove bronchogenic cysts in children (Monrigal and Granry), 694
 - *obstruction*
 - caused by preoperative marijuana inhalation: an airway concern (Mallat *et al*), 691
 - insertion of laryngeal mask airway with a laryngoscope in paediatric patients to avoid (Elwood and Cox), 435
 - paradoxical vocal cord motion in the recovery room: a masquerader of pulmonary dysfunction: clinical report (Arndt and Voth), 1249
 - reversible, physiological perspectives of therapy: review article (Pinto Pereria *et al*), 700
 - tracheal stenosis and myasthenia gravis, anaesthetic management of a patient with: clinical anaesthesia file, (Froelich, discussion Eagle), 84
 - oropharyngeal and nasopharyngeal: I (1880-1995): History of Anaesthesia (McIntyre), 629
 - preoperative assessment: do we measure up? (Karkouti *et al*), A64-A
 - problems, incidence of, depends on the definition used (Rose and Cohen), 30
 - reactive diseases, bronchospasm, perioperative management of patients with: review article (Pinto Pereira *et al*), 700
- Alfentanil, *see under* Anaesthetics, intravenous; Analgesics
 Alopecia, *see under* Complications
 Ambulatory anaesthesia, *see under* Anaesthesia, outpatient
 Ambulatory surgery, *see under* Surgery
 Amlodipine, *see under* Pharmacology
 Anaemia, *see under* Complications
 Anaesthesia
 - analgesia for removal of retained placentas (Paetkau *et al*), A61-A
 - and the transplanted patient: refresher course outline (Sharpe), R89; R94
 - care and audit: 150 years on: editorial (Davies), 323
 - chewing gum prior to anaesthesia - is not age restricted: correspondence (Taye and Brock-Utne), 1080

- for major vascular surgery: refresher course outline (Beattie), R3; R8
- *cardiac/cardiovascular*
 - aortic surgery, perioperative ischaemia in: combined epidural/general anaesthesia and epidural analgesia vs general anaesthesia and iv analgesia (Garnett *et al*), 769
 - cardiopulmonary bypass, ulinastatin reduces elevation of cytokines and soluble adhesion molecules during cardiac surgery (Kawamura *et al*), 456
 - contribution of Canadian anaesthetists to the evolution of cardiac surgery: history of cardiac anaesthesia (Wynands), 518
 - coronary artery bypass, elective, comparison of sevoflurane/fentanyl and isoflurane/fentanyl during (Searle *et al*), 890
 - echocardiography, transoesophageal: equipment in anaesthesia (Béique *et al*), 252; clinical applications (Oxorn *et al*), 278
 - intensive care unit length of stay following, can clinicians predict (Tu and Mazer), 789
 - new volatile anaesthetics in cardiovascular anaesthesia: editorial (Thomson), 883
- see also*, Surgery, cardiac; cardiovascular
- *depth*
 - awareness
 - during anaesthesia: editorial (Aikenhead), 206
 - unintentional intraoperative, during sufentanil anaesthesia for cardiac surgery: clinical report (Gilon *et al*), 295
 - with recall, midazolam and, during total intravenous anaesthesia (Miller *et al*), 947
- drug errors in a survey of 650 practitioners (Chen *et al*), A13-A
- electroconvulsive therapy, divided doses of methohexitone improves outcome: correspondence (Gurmarnik *et al*), 535
- general, of a bullous pemphigoid patient: correspondence (Yaniv *et al*), 1181
- haemoglobin determination during, photometer based, is it as accurate as laboratory values? (Jaeger *et al*), 795
- in patients with asthma: correspondence (Mercier and Benhamou), 195; reply (Kuwahara and Goresky), 196
- in the media (Rabuka and Moote), A12-B
- induction, optimal dose of thiamylal in combination with midazolam for induction of anaesthesia (Nishiyama and Hanaoka), 1134
- laparoscopic cholecystectomy in elderly patients, ASA III, haemodynamics (Dhoste *et al*), 783
- lower airway injuries and: review article (Devitt and Boulanger), 148
- MAOIs and (monoamine oxidase inhibitors): correspondence (Clark), 641
- monitoring, cardiac output (index), changes in arterial PCO₂ and end-tidal PCO₂ (Wahba *et al*), 243
- muscle sounds in anaesthetized patients (McKay *et al*), A10-A
- neuroanaesthesia, airway management in: review article (Spiekermann *et al*), 820
- neurological, trends in: refresher course outline (Cottrell), R61; R69
- *obstetric/gynaecological*
 - acute pruritus: development of a scale for measurement of (Halpern), A58-B
 - analgesia/anaesthesia for removal of retained placentas (Paetkau *et al*), A61-A
 - buprenorphine, epidural administered, in the perioperative period (Miwa *et al*), 907
 - Caesarean section
 - emergency, omperazole before: correspondence (Franzca), 878
 - epidural morphine vs hydromorphone in post-Caesarean section patients (Halpern *et al*), 595
 - for hysterectomy in a patient with a preoperative diagnosis of placenta percreta with invasion of the urinary bladder: obstetric forum (Hunter and Kleiman), 246
 - for labour and delivery in a parturient with mitochondrial myopathy: clinical report (Rosaeg *et al*), 403
 - haemodilution for (Grange *et al*), A59-B
 - in a Marfan patient with recurrent aortic dissection: clinical report (Tritapepe *et al*), 1153
 - maternal death following: correspondence (Bourne and Mushambi), 318
 - morphine vs hydromorphone in post-Caesarean section patients (Halpern *et al*), 621
 - spinal anaesthesia for, in a patient with a cervical arteriovenous malformation: obstetrical forum (Ong *et al*), 1052
 - use of LMA for awake intubation for: clinical report (Godley and Reddy), 299
 - with a subdural catheter (Gershon), 1068
- coagulation abnormalities associated with intrauterine fetal death, prevalence of (Maslow *et al*), 1229
- difficult intubation in: correspondence (Pogulanik *et al*), 879
- EMLA for analgesia prior to epidural needle insertion, a randomized, double-blind placebo-controlled trial (Muir *et al*), A60-A
- *epidural*
 - analgesia, haemodynamic consequences and uterine contractions following 0.5 or 1.0 litre crystalloid infusion before (Zamora *et al*), 347
 - analgesia for labour in a patient with Charcot-Marie-Tooth disease: clinical report (Scull and Weeks), 1150
 - for labour and delivery: fentanyl or sufentanil? (Cohen *et al*), 341
 - for pain relief in labour, trigeminal nerve blockade following inadvertent dural puncture - was there a connection? correspondence (O'Hanlon *et al*), 31
 - hysterectomy, a comparison of ranitidine, droperidol or placebo in the prevention of nausea and vomiting after (Cozanaitis *et al*), 106

- hysteroscopy and: review article (Ananthanarayan *et al*), 56
- intrauterine fetal death, prevalence of coagulation abnormalities associated with (Maslow *et al*), 1237
- labor analgesia: a pilot study to compare patient-controlled intravenous analgesia with patient-controlled epidural analgesia to determine if analgesic methods affect delivery outcome (Muir *et al*), A60-B
- management of a parturient with severe muscular dystrophy, lumbar lordosis and a difficult airway: clinical anaesthesia file (Pash), 959
- post-delivery perineal pain: comparison of ibuprofen versus acetaminophen with codeine for (Peter *et al*), A59-A
- regional, combined spinal-epidural in a labouring parturient, meningitis following: clinical report (Cascio and Heath), 399; correspondence (Eldor), 1183; reply (Cascio), 1184
- outpatient, postoperative symptoms 24 hours after ambulatory anaesthesia (Chung *et al*), 1121
- *paediatric*
 - atropine, should it be routine in? correspondence (Guyton and Scharf), 754; reply (McAuliffe), 754
 - balloon dilation for congenital tracheal stenosis in an infant: correspondence (Kinouchi *et al*), 1081
 - bleeding after tonsillectomy, increased by preoperative ketorolac (Splinter *et al*), 560
 - bronchogenic cysts in children, excision using an ultrathin fiberoptic bronchoscope (Monrighal and Granry), 694
 - cerebral blood flow velocity after mannitol infusion in children (Soriano *et al*), 461
 - congenital diaphragmatic hernia past the neonatal period: a life threatening emergency: optimal care: clinical report (Paut *et al*), 621
 - continuous caudal, with chloroprocaine as an adjunct to general anaesthesia in neonates: clinical report (Tobias *et al*), 69
 - cuff bulk of tracheal tubes in adolescence: anaesthesia equipment (Jones and Ueda), 514
 - day surgery, withholding oral fluids from, reduces vomiting (Kearney *et al*), A42-B
 - dorsal penile nerve block in children undergoing circumcision in a day-care surgery (Serour *et al*), 954
 - epidural and intravenous bolus morphine for postoperative analgesia in infants (Habaerkern *et al*), 1203
 - familial normokalaemic paralysis, anaesthetic management of five-year-old boy: clinical report (Walsh and Kelly), 684
 - for restorative dental surgery in children, comparative effects of three doses of intravenous ketorolac or morphine on emesis and analgesia for (Purday *et al*), 221
 - humidification reduces coughing and breath-holding during inhalation induction with isoflurane in children (Cregg *et al*), 1090
 - inhalation induction: editorial (Goresky and Muir), 1085
 - in remote locations: necessary expeditions or anaesthetic misadventures? (Roy), 764
 - inhalation endotracheal anaesthesia, repetitive, for cobalt radiotherapy in a child: clinical report (LeDez *et al*), 835
 - intensive care unit, continuous infusion of rocuronium in (Tobias), 353; correspondence (Withington), 1183; reply (Tobias), 1183
 - ketorolac, preoperative increases bleeding after tonsillectomy in children (Splinter *et al*), 560
 - laryngeal mask insertion with a laryngoscope in (Elwood and Cox), 435
 - laser ablation of facial port-wine stains, ketamine sedation obviates the need for general anaesthesia in children: correspondence (Pullerits *et al*), 755
 - malignant hyperthermia involving the administration of desflurane in a ten-year-old boy (Fu *et al*), 687
 - management of a patient with glycogen storage disease type 1b: clinical report (Shenkman *et al*), 467
 - midazolam for caudal analgesia in children: correspondence (Naguib and Seraj), 535; reply (Goresky), 536
 - oncology procedures, sedation for, propofol vs midazolam (Splinter *et al*), A44-A
 - otoplasty, analgesia after: regional nerve blockade vs local anaesthetic infiltration of the ear (Cregg *et al*), 141
 - outpatient, ketamine sedation obviates the need for general anaesthesia in children having laser ablation of facial port-wine stains: correspondence (Pullerits *et al*), 755
 - pain management in children: refresher course outline (Rice), R155; R159
 - pain reduction after inguinal hernia repair: caudal anaesthesia vs ketorolac (Splinter *et al*), A42-A
 - postoperative vomiting
 - after strabismus surgery, prevention: propofol vs ondansetron (Splinter *et al*), A41-A
 - after strabismus surgery and tonsillectomy, reduced by granisetron (Fujii *et al*), 35
 - after tonsillectomy, dexamethasone decreases (Splinter *et al*), A41-B
 - antiemetic efficacy of granisetron and metoclopramide in children undergoing ophthalmic or ENT surgery (Fujii *et al*), 1095
 - granisetron and dexamethasone provide more improved prevention of postoperative emesis than granisetron alone (Yoshitaka *et al*), 1229
 - increased by prolonged exposure to nitrous oxide (Splinter *et al*), A9-B
 - prophylactic therapy after adenotonsillectomy: a comparison of dimenhydrinate, ondansetron or placebo (Hamid *et al*), A43-B
 - remote locations (from the operating room), repetitive inhalation endotracheal anaesthesia for cobalt radiotherapy in a child: clinical report, (LeDez *et al*), 835

- residual neuromuscular blockade in children, acceleromyography improved detection (Ansermino *et al*), 589
- rocuronium in the paediatric ICU unit (Tobias), 353; correspondence (Withington), 1183; reply (Tobias), 1183
- tracheal intubation, rapid method for determination of end-tidal sevoflurane concentration for (Inomata and Nishikawa), 806
- twins, conjoined, with complex cardiac anomalies, anaesthetic management: clinical report (Chen *et al*), 1161
- ventilation during halothane anaesthesia in infants less than two months of age (Brown), 121
- ventilatory parameters during propofol anaesthesia: a comparison with halothane (Brown and Kulkarni), A24-B; (Kulkarni and Brown), 653
- PGY-1 selection: CaRMS objective dossier scores are not predictive of success in structured interviews (Spadafora and Fuller), A30-B
- preemptive analgesia in urologic patients (Lavoie *et al*), A10-B
- propofol-induced movements modified by oral midazolam premedication (Macnab *et al*), A43-A
- postoperative care: editorial (Ralley), 759
- preoperative anaesthetic out-patient clinics in Switzerland: correspondence (Klopfenstein and Foster), 317
- quality in, an integrated and constructive model: refresher course outline (Hardy and Pelletier), R75; R83
- respiratory depression after low-dose caudal morphine: clinical report (Karl *et al*), 1065
- Anaesthesiologists
 - importance of traits of, as ranked by operating room nurses (Doyle and Kim), A31-A
- training
 - simulation-based Anaesthesia Crisis Resource Management, an intimidating concept, a rewarding experience (Kurrek and Fish), 430
 - simulation: it's a start: editorial (Davies and Helmreich), 425
- turn-over time between patients (Melnik and Tessler), A11-B
- Anaesthetic techniques
 - bronchoscopy, placement of left double-lumen tubes with or without a stylet (Lieberman *et al*), 238
 - cricoid pressure impedes positioning and ventilation through the laryngeal mask airway (Aoyama *et al*), 1035
- epidural
 - analgesia for labour and delivery: fentanyl or sufentanil? (Cohen *et al*), 341
 - and intravenous ketamine, antinociceptive effects of, to somatic and visceral stimuli in rats: laboratory investigation (Alam *et al*), 408
 - and spinal haematoma: brief review (Wulf), 1260
 - blood patch, spinal subdural haematoma as a complication of immediate: clinical report (Tekk  k *et al*), 306
 - buprenorphine in the perioperative period (Miwa *et al*), 907
 - continuous infusion of ropivacaine for prevention of postoperative pain after major orthopaedic surgery (Badner *et al*), 17
 - depo-medrol, chronic, effect on the hypothalamic-pituitary-adrenal axis (Mathierson *et al*), A17-A
 - double-blind comparison of ropivacaine 0.5%, 0.75%, 1.0% and bupivacaine 0.5%, injected epidurally, in patients undergoing abdominal hysterectomy (Finucane *et al*), 442
 - fentanyl improves the onset and spread of epidural mepivacaine analgesia (Kasaba *et al*), 1211
 - general combined and epidural analgesia vs general anaesthesia and *iv* analgesia: perioperative ischaemia in aortic surgery (Garnett *et al*), 769
 - in cases of ankylosing spondylitis: clinical report (Schelew *et al*), 65
 - steroid injections, bacterial meningitis and cauda equina syndrome after: clinical report (Cooper and Sharpe), 471
 - test dose use in anesthetic literature: how standard is this practice? (Lunt and Coombs), A58-A
- extubation, tracheal, prostaglandin E₁ attenuates the hypertensive response to (Nishina *et al*), 678
- in patients with coronary artery disease undergoing non-cardiac surgery: refresher course outline (Ramsay), R99; R104
- induction by inhalation
 - editorial (Goresky and Muir), 1085
 - humidification reduces coughing and breath-holding during inhalation induction with isoflurane in children (Cregg *et al*), 1090
- intrathecal, intravenous morphine in rats, L-NAME has a synergistic, antinociceptive synergistic interaction with: laboratory investigation (Yamaguchi and Naito), 975
- intravenous, new drugs, new concepts, and clinical applications: refresher course outline (Miller), R142; R149
- peribulbar, intravenous sedation prior to, for cataract surgery in elderly patients (Wong and Merrick), 1115
- regional
 - block
 - axillary, effects of CO₂ and epinephrine on lidocaine 1% (Martin *et al*), A15-B
 - brachial plexus, does clonidine increase the duration of analgesia in (N'Guyen *et al*), A55-B
 - caudal epidural block, continuous with chlorprocaine as an adjunct to general anaesthesia in neonates; clinical report (Tobias *et al*), 69
 - caudal morphine, respiratory depression after low-dose: clinical report (Karl *et al*), 1065
 - combined spinal epidural technique, in a labouring term parturient aseptic meningitis using needle-through-

- needle technique: clinical report (Cascio and Heath), 399; correspondence (Eldor), 1183; reply (Cascio), 1184
 - dorsal penile nerve block in children undergoing circumcision in a day-care surgery (Serour *et al*), 954
 - during spinal anaesthesia, a comparison using 2% isobaric vs hyperbaric lidocaine (Jankowska and Veillette), A16-B
 - infiltration of ear vs nerve blockade for analgesia after otoplasty (Cregg *et al*), 141
 - interscalene brachial plexus, delayed bilateral spinal anaesthesia following: clinical report (Norris *et al*), 303
 - neuromuscular, profound mivacurium-induced, reversal of (Kao and Le), 1128
 - paravertebral block for breast cancer surgery: anaesthetic technique (Greengrass *et al*), 858
 - sciatic nerve block, supine approach to, in the popliteal fossa: clinical report (Vloka *et al*), 964
 - subarachnoid block, anterior epidural haematoma following: correspondence (Bartoli *et al*), 94
 - suprascapular nerve, for pain relief after arthroscopic shoulder surgery (Ritchie *et al*), A56-A
 - combined spinal-epidural technique in a labouring term parturient, meningitis following: clinical report (Cascio and Heath), 399
 - impaired haemostasis and: refresher course outline (Stafford-Smith), R129; R136
 - peripheral, three techniques compared for outpatient knee arthroscopy (Goranson *et al*), A15-A
 - saphenous nerve anaesthesia - a nerve stimulator technique: anaesthetic techniques (Comfort *et al*), 853
 - sleep apnoea syndrome, anaesthetic management of patients with: review article (Boushra), 599
 - spinal
 - age factor, influence of, on ease of accomplishing (Tessler *et al*), A57-A
 - and general combined for laparoscopic cholecystectomy: correspondence (Gurmarnik *et al*), 95
 - comparison of differential blockade during, using 2% isobaric vs hyperbaric lidocaine (Jankowska and Veillette), A16-B
 - comparison of glucose 7.5% and 0.75% with or without phenylephrine for tetracaine spinal anaesthesia, (Sumi *et al*), 1138
 - comparison of haemodynamic effects of intrathecal meperidine, meperidine-bupivacaine mixture and hyperbaric bupivacaine (Conway *et al*), A23
 - delayed bilateral, following interscalene brachial plexus block: clinical report (Norris *et al*), 303
 - effects of ketamine on analgesic morphine requirements, in patients with terminal cancer pain (Yang *et al*), 379
 - failed, cause identified by MRI: clinical report (Hirabayashi *et al*), 1072
 - for Caesarean section in a patient with a cervical arteriovenous malformation: obstetric forum (Ong *et al*), 1052
 - for prostatectomy, mechanics of expiratory muscles in (Bellemare *et al*), A25-B
 - graduated compression stocking prevents hypotension during: correspondence (Iwama), 984
 - haemorrhoidectomy with, wound infiltration with lidocaine prolongs postoperative analgesia after (Morisaki *et al*), 914
 - in a patient with Emery-Dreifuss muscular dystrophy: clinical report (Jensen), 968
 - in case of ankylosing spondylitis: clinical report (Schelew and Vaghadia), 65
 - ketamine, spinal, for hemithyroidectomy: correspondence (Sekaran *et al*), 537
 - with glucose-free 2% lidocaine, three needles compared (Bédard *et al*), A57-B
 - subdural, surgical anaesthesia for Caesarean section with a subdural catheter: clinical report (Gershon), 1068
- Anaesthetics
- drug costs and utilization: editorial (Miller), 4; (Kantor and Chung), 9
- Anaesthetics, gases
- ethanol, effects of, on complications and outcome from blunt trauma: an intensive care unit study (Rabuka and Moote), A12-B
 - nitric oxide
 - inhaled
 - does it regulate coronary metabolic rate? (Koutsoukos and Belo), A49-B
 - does not decrease pulmonary artery (PA) systolic pressure in patients with left ventricular (LV) systolic dysfunction (Johnson *et al*), A25-A
 - extrapulmonary effects of (Troncy *et al*), A25-A
 - nitrogen oxide (NO)
 - exposure, prolonged, increases postoperative vomiting in children (Splinter *et al*), A9-B
 - measurements by chemoluminescence (Yang *et al*), A9-A
 - nitrous oxide
 - and propofol, opioid supplementation: effects of different opioids on recovery (Cohen and Hudson), A14-A
 - xenon is another laughing gas: correspondence (Kawaguchi *et al*), 641
- Anaesthetics, intravenous
- alfentanil/propofol (total anaesthesia), midazolam and awareness with recall during (Miller *et al*), 946
 - droperidol
 - compared with propofol and metoclopramide for treatment of postoperative nausea and vomiting (Lacroix *et al*), 115
 - compared with ranitidine or placebo in prevention of nausea and vomiting after hysterectomy (Cozanitis *et al*), 106
 - inhibits tracheal contraction induced by serotonin, hista-

- mine or carbachol in guinea pigs: laboratory investigation (Sato *et al*), 172
- metoclopramide combination, for antiemetic prophylaxis (Belo and Vaillancourt), A63-B
- morphine combination for reduction of post-operative nausea and vomiting in patient controlled analgesia (Klashen), A14-B
- *fentanyl*
 - during cardiopulmonary bypass, multicompartment pharmacokinetic model for (Botero *et al*), A3-B
 - induced coughing suppressed by terbutaline inhalation (Lui *et al*), 1216
 - induction in coronary artery disease, rocuronium vs vecuronium during (Botero *et al*), A3-A
 - propofol and ketamine versus fentanyl for open heart surgery (Botero *et al*), A4-A
 - sevoflurane and isoflurane/fentanyl, a comparison during elective coronary artery bypass surgery (Searle *et al*), 890
- *ketamine*
 - and propofol versus fentanyl for open heart surgery (Botero *et al*), A4-A
 - combined with morphine compared with morphine alone for postoperative analgesia (Javery *et al*), 212
 - concentrations during cardiopulmonary bypass (McLean *et al*), 580
 - effects on cricothyroid and posterior cricoarytenoid muscles of the canine larynx compared with propofol and thiamylal: laboratory investigation (Iwasaki *et al*), 39
 - sedation obviates the need for general anaesthesia in children having laser ablation of facial port-wine stains: correspondence (Pullerits *et al*), 755
 - sedative infusions during surgery, propofol vs propofol-ketamine (Botero), A11-A
 - spinal, for hemithyroidectomy (Sekaran *et al*), 537
- methohexitone, divided doses of improves ECT outcome: correspondence (Gurmarik *et al*), 535; reply (Janis), 353
- midazolam in combination with thiamylal, optimal dose for induction of anaesthesia, Nishiyama and Hanaoka, 1134
- new drugs, new concepts and clinical applications: refresher course outline (Miller), R142; R149
- *propofol*
 - alfentanil/O₂ total anaesthesia, influence of midazolam on infusion requirements and recovery characteristics of (Miller *et al*), 946
 - and ketamine versus fentanyl for open heart surgery (Botero *et al*), A4-A
 - changes in autonomic cardiovascular control with increasing levels of propofol sedation (Lafreniere *et al*), A45-A
 - compared with droperidol and metoclopramide in treatment of postoperative nausea and vomiting (Lacroix *et al*), 115
 - delirium, prolonged after: correspondence (Gadalla and Spencer), 877
 - effects on cricothyroid and posterior cricoarytenoid muscles of the canine larynx compared with ketamine and thiamylal: laboratory investigation (Iwasaki *et al*), 39
 - efficacy of, in reducing sodium nitroprusside requirements to control mean arterial pressure and systemic vascular resistance during cardiopulmonary bypass (Greenhow *et al*), A27-A
 - for rapid sequence intubation, prevention of hypotension after: correspondence (Gin), 877
 - for repair of congenital heart defects (Parker *et al*), A5-B
 - induced movements in children, modification by oral midazolam premedication (Bevan *et al*), A43-A
 - in children, ventilatory parameters compared with halothane (Brown and Kulkarni), A24-B; Kulkarni and Brown), 653
 - midazolam increases the affinity of the GABA_A receptor for (McAdam *et al*), A49-A
 - myoclonus: correspondence (Strachan and Raithatha), 536
 - no lipid droplets in blood during: correspondence (Iwama *et al*), 1081
 - patient-controlled sedation for elderly patients: safety and patient attitude toward control (Herrick *et al*), 1014
 - refractory dystonia during, in a patient with torticollis-dystonia disorder: clinical report (Zabani and Vaghadia), 1062
 - to facilitate laryngeal mask airway, comparison versus thiopentone with midazolam or lidocaine (Bapat *et al*), 564
 - vs ondansetron for prevention of vomiting after strabismus surgery (Splinter *et al*), A41-A
 - vs propofol-ketamine, sedative infusions during surgery (Botero *et al*), A11-A
 - vs thiopental/lidocaine combinations for laryngeal mask airway(LMA) insertion - a dose finding study (Kashkari *et al*), A18-A
- *sufentanil*
 - does dose influence haemodynamics during induction of anaesthesia for coronary artery bypass grafting? (Thomson *et al*), A28-B
 - does dose influence isoflurane requirements during coronary artery surgery? (Moon *et al*), A28-A
 - for cardiac surgery, unintentional intraoperative awareness during: clinical report (Gilron *et al*), 295
- *thiamylal*
 - combined with midazolam, optimal dose of, for induction of anaesthesia (Nishiyama and Hanaoka), 1134
 - effect on cricothyroid and posterior cricoarytenoid muscles of the canine larynx, compared with propofol and ketamine: laboratory investigation (Iwasaki *et al*), 39
 - *thiopental*
 - lidocaine combinations vs propofol for laryngeal mask air-

- way(LMA) insertion – a dose finding study (Kashkari *et al*), A18-A
- *thiopentone*
 - high-dose, for open-chamber cardiac surgery (Pascoe *et al*), 575
 - induced enhancement of somatic motor responses to noxious stimulation: influence of GAGA_A receptor modulation: laboratory investigation (Archer *et al*), 503
 - precipitate formed by thiopentone and vecuronium: technical report (Taniguchi *et al*), 511
- Anaesthetics, local
 - *bupivacaine*
 - comparison of haemodynamic effects of intrathecal meperidine, meperidine-bupivacaine mixture and hyperbaric bupivacaine (Conway *et al*), 23
 - double-blind comparison with ropivacaine injected epidurally, in patients undergoing abdominal hysterectomy (Finucane *et al*), 442
 - etidocaine and lidocaine, clinical effects of routine alkalization of: review article (Chassard *et al*), 384
 - intra-articular, addition of morphine to, does not improve outcome following knee replacement surgery (Badner *et al*), A54-A
 - potassium channel agonists modify the local anaesthetic activity of, in mice: laboratory investigation (Gantenbein *et al*), 871
 - chloroprocaine, continuous caudal anaesthesia with, as an adjunct to general anaesthesia in neonates (Tobias *et al*), 69
 - *EMLA*[®] (*Eutectic mixture of local anaesthetics*)
 - for analgesia prior to epidural needle insertion, a randomized, double-blind placebo-controlled trial (Muir *et al*), A60-A
 - is not effective for extracorporeal shock wave lithotripsy (Ganapathy *et al*), 1030
 - lidocaine-prilocaine cream, is it useful for venous puncture in preoperative autologous blood donation? (Vivien *et al*), 232
 - patch, controlled trials of, for reduction of pain associated with intravenous cannulation in adult surgical outpatients (Vaghadia and Alahdal), A53-A
 - *lidocaine*
 - isobaric vs hyperbaric 2%, comparison of differential blockade during spinal anaesthesia (Jankowska and Veillette), A16-B
 - 1%, effects of CO₂ and epinephrine on, in axillary block (Martin *et al*), A15-B
 - spinal anaesthesia with glucose-free 2%, a comparison of three spinal needles in (Bédard *et al*), A57-B
 - thiopental combinations, vs propofol for laryngeal mask airway(LMA) insertion – a dose finding study (Kashkari *et al*), A18-A
 - with thiopentone to facilitate laryngeal mask insertion, compared with propofol (Bapat *et al*), 564
 - wound infiltration with, prolongs postoperative analgesia after haemorrhoidectomy with spinal anaesthesia (Morisaki *et al*), 914
 - mepivacaine, epidural analgesia, epidural fentanyl improves onset and spread of (Kasaba *et al*), 1211
 - *ropivacaine*
 - continuous epidural infusion of, for the prevention of postoperative pain after major orthopaedic surgery (Badner *et al*), 12
 - double-blind comparison with bupivacaine injected epidurally in patients undergoing abdominal hysterectomy (Finucane *et al*), 442
 - tetracaine spinal anaesthesia, comparison of glucose 7.5% and 0.75% with or without phenylephrine for (Sumi *et al*), 1138
- Anaesthetics, Volatile
 - *desflurane*
 - isoflurane, sevoflurane (new volatile anaesthetics) in cardiovascular anaesthesia: editorial (Thomson), 883
 - malignant hyperthermia involving administration of (Fu *et al*), 687
 - *halothane*
 - hepatotoxicity and hepatic free radical metabolism in guinea pigs; the effects of vitamin E (Durak *et al*), 741
 - impairs both systolic and diastolic function in the newborn pig (Graham *et al*), 495
 - in children, ventilatory parameters compared with propofol (Brown and Kulkarni), A24-B; (Kulkarni and Brown), 653
 - in infants less than two months of age, pattern of ventilation during (Brown), 121
 - *isoflurane*
 - and fentanyl compared with sevoflurane/fentanyl during elective coronary artery bypass surgery (Searle *et al*), 890
 - and sevoflurane for elective coronary artery bypass surgery, a multicenter study comparing cardiovascular effects (Searle *et al*), A35-B
 - and sevoflurane impair edrophonium reversal of vecuronium-induced neuromuscular block (Morita *et al*), 799
 - changes in cerebral arteriovenous oxygen content difference by surgical incision are similar during sevoflurane and isoflurane (Inada *et al*), 1019
 - chronic coronary obstruction and acute ischaemia during isoflurane anaesthesia, comparison of nifedipine and metoprolol on collateral coronary blood flow in a swine model: laboratory investigation (Cheng *et al*), 160
 - comparative assessment of the effects of intramuscular and epidural clonidine on requirements (Samsó *et al*), 1195
 - haemodynamics during induction of anaesthesia for coronary artery bypass grafting, does sufentanil dose influence? (Thomson *et al*), A28-B

- high cerebral concentrations of, movement associated with: laboratory investigation (Antognini), 310
- humidification reduces coughing and breath-holding during inhalation induction with isoflurane in children (Cregg *et al*), 1090
- impairs both systolic and diastolic function in the newborn pig: laboratory investigation (Graham *et al*), 495
- left ventricular filling during isoflurane anaesthesia, echocardiographic assessment of (Oxorn *et al*), 569
- MAC, intrathecally administered NMDA receptor antagonists reduce the MAC of isoflurane in rats (Ishizaki *et al*), 724
- requirements during coronary artery surgery, does sufentanil dose influence? (Moon *et al*), A28-A
- *sevoflurane*
 - and fentanyl and isoflurane/fentanyl, comparison of, during elective coronary artery bypass surgery (Searle *et al*), 890
 - and isoflurane for elective coronary artery bypass surgery, a multicenter study comparing cardiovascular effects (Searle *et al*), A35-B
 - and isoflurane impair edrophonium reversal of vecuronium-induced neuromuscular block (Morita *et al*), 799
 - distribution of diaphragm blood flow during, in dogs (Ide *et al*), 44
 - for a patient with adult polyglucosan body disease: clinical report (Inoue *et al*), 1257
 - for tracheal intubation in children, determination of end-tidal concentration of using rapid method (Inomata and Nishikawa), 806
 - glucose tolerance during prolonged: brief report (Iwasaka *et al*), 1059
- **Analgesia**
 - caudal, in children, midazolam for: correspondence (Naguib and Khalid), 535
 - EMLA for, prior to epidural needle insertion, a randomized, double blind placebo-controlled trial (Muir *et al*), A60-A
 - hyperalgesia associated with thiopentone is not mediated primarily by GABA_A receptors: laboratory investigation (Archer *et al*), 503
 - *patient-controlled (PCA)*; *see also* Analgesia, postoperative
 - alfentanil given by a pharmacokinetic-based target controlled infusion, during extracorporeal shock wave lithotripsy (Irwin *et al*), 919
 - costs, patient attitudes toward (Badner *et al*), A53-B
 - eutectic mixture of local anaesthetics is not effective for extracorporeal shock wave lithotripsy (Ganapathy *et al*), 1030
 - in labor, patient-controlled intravenous, compared with patient-controlled epidural analgesia to determine if analgesic method affects delivery (Muir *et al*), A60-B
 - in the elderly surgical population (Corvo *et al*), A54-B
 - in post-operative cardiac surgery (Tsang and Brush), A55-A
 - postoperative morphine requirements reduced by oral clonidine (Park *et al*), 900
 - propofol sedation for elderly patients: safety and patient attitude toward control (Herrick *et al*), 1014
 - reduction of post-operative nausea and vomiting with combination of morphine and droperidol in (Klashen *et al*), A14-B; 1100
 - *postoperative*; *see also* Analgesia, patient controlled
 - after haemorrhoidectomy with spinal anaesthesia, wound infiltration with lidocaine prolongs (Morisaki *et al*), 914
 - after maxillofacial surgery, intravenous ketorolac vs diclofenac (Tarkkila *et al*), 216
 - after otoplasty: regional nerve blockade vs local anaesthetic infiltration of the ear (Cregg *et al*), 141
 - clonidine and alpha₂-agonists for: editorial (Sandler), 1191
 - comparative assessment of the anaesthetic and analgesic effects of intramuscular and epidural clonidine in humans (Samsó *et al*), 1195
 - comparison of morphine and morphine with ketamine for (Javery *et al*), 212
 - epidural administered buprenorphine in the perioperative period (Miwa *et al*), 907
 - in infants, epidural and intravenous bolus morphine for (Haberken *et al*), 1203
 - improvement with preoperative piroxicam (O'Hanlon *et al*), 102; editorial (Penning), 97
 - patient controlled oral analgesia (PCORA) with morphine: anaesthesia equipment (Striebel *et al*), 749
 - preemptive, in paediatric urologic patients (Lavoie *et al*), A10-B
 - sedation, intravenous, prior to peribulbar anaesthesia for cataract surgery in elderly patients (Wong and Merrick), 1115
 - sedative infusions during surgery: propofol vs ketamine (Botero *et al*), A11-A
 - technique, spinal: intrathecal ketorolac tromethamine produces analgesia after chronic constriction injury of sciatic nerve in rats: laboratory investigation (Parris *et al*), 867
- *see also* Anaesthesia, obstetric
- **Analgesics**
 - alfentanil, patient maintained, target-controlled infusion for analgesia during extracorporeal shock wave lithotripsy (Irwin *et al*), 919
 - buprenorphine in the perioperative period, epidural administered (Miwa *et al*), 907
 - cholinergic, clonidine for brachial plexus block does it increase the duration of analgesia? (N'Guyen *et al*), A55-B
 - enkephalinase inhibitor, ONO-9902, antinociceptive effects of, after visceral stress conditions in rats (Yamamori *et al*), 1175

- *fentanyl*
 - epidural, improves the onset and spread of epidural mepivacaine analgesia (Kasaba *et al*), 1211
 - or sufentanil for epidural analgesia for labour and delivery? (Cohen *et al*), 341
 - *ketamine*
 - epidural intravenous, antinoceptive effects of, to somatic and visceral stimuli in rats: laboratory investigation (Alam *et al*), 408
 - intrathecal, reduces morphine requirements in patients with terminal cancer pain (Yang *et al*), 379
 - *meperidine*
 - comparison of haemodynamic effects of intrathecal meperidine, meperidine-bupivacaine mixture and hyperbaric bupivacaine (Conway *et al*), 23
 - *morphine*
 - added to intra-articular bupivacaine does not improve outcome following knee joint replacement (Badner *et al*), A54-A
 - antinociceptive synergistic interaction between morphine and n^w -nitro l-arginine methyl ester on thermal nociceptive tests in rats: laboratory investigation (Yamaguchi and Naito), 975
 - caudal, low dose, respiratory depression after: clinical report (Karl *et al*), 1065
 - combined with droperidol to reduce post-operative nausea and vomiting in patient controlled analgesia (Cohen *et al*), A14-A
 - comparison of morphine and morphine with ketamine for postoperative analgesia (Javery *et al*), 212
 - epidural and intravenous bolus morphine for postoperative analgesia in infants (Haberkm *et al*), 1203
 - epidural, vs hydromorphone in post-Caesarean section patients (Halpern *et al*), 595
 - intrathecal: influence on recovery of cardiac surgical patients (FitzPatrick and Stafford-Smith), A56-B
 - intravenous versus ketorolac, comparative effects of three doses of, on emesis and analgesia for restorative dental surgery in children (Purday *et al*), 221
 - patient controlled oral analgesia with (PCORA), (Striebel *et al*), 749
 - *narcotic*
 - for aortocoronary bypass surgery, respiratory outcomes in patients anaesthetized with high dose or low dose (Johnson *et al*), A4-B
 - *NSAID's*
